DETAILED ACTION

The amendment filed 4/7/04 has been considered in preparing this Office action.

Claim Rejections - 35 USC § 112

1. Claim 6 recites the limitation "said controller" in line 1. There is insufficient antecedent basis for this limitation in the claim. Corrections are also required for claims 7, 8 and 19. Changing the claim dependency from claim 2 to claim 4 would overcome the rejection.
2. Claim 9 recites the limitation "said passive digital stereo video data stream" in line 4. There is insufficient antecedent basis for this limitation in the claim.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 2 and 20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,680,739. Although the conflicting claims are not identical, they are not patentably distinct from each other because the only difference is that present invention claims an

input mechanism includes the multiple compositing elements and the patent also claims multiple compositing elements, but did not mention of an input mechanism. The merely recitation of the input mechanism in present invention is for compositing the multiple graphical data streams which is what claimed in the patent. Therefore, the claims 2 and 20 are rejected under the judicially created doctrine of obviousness-type double patenting.

Response to Arguments

5. Applicant's arguments with respect to claims 1-9 and 19-20 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

6. Claims 3-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
